## HOBBIES

**Video Filmmaker/Photographer**  
**Music Composer /Sound Designer**  
**Motion and Graphic Designer**

## STATEMENT

In my work, creative flair and professionalism are two things that cannot be separated. I love what I do, even in advertising I have always been the person who best understood the message to be conveyed through music. This skill has also been useful in conveying emotions when commenting on video images and better conveying and directing emotions. The fact that I also have a degree in Media Arts, and work successfully as a filmmaker, allows me to better interact between video and music, understanding the expressive dynamics of both means of communication.

In practice, when I work on audio, I have the skills to understand the dynamics of images, and when I work on video, I am able to interact with the needs of audio.

Music and images have always been present in my life, and I have always been able to use them as a means of communication to better share my emotions, and emotions are what make me feel alive.

Never stop to get emotional!
